SIMPLE FAST SAFE**

SAFE GUARD YOUR ACCOUNTS

We are requesting that you change your password to be at least six characters long. Using uppercase and lowercase letters, numbers and symbols. Never use common information that someone else would know; i.e. your birth date, or mothers' maiden name etc.

To further protect your data our home banking page will begin to have you answer some challenge questions along with your password information. We realize that this takes more time, however this is another safe guard that we are taking to secure your accounts.

**CHANGE YOUR PASSWORDS
FREQUENTLY**

We will never e-mail you asking you to update your personal information. We already have it. If you receive something that looks or sounds strange always contact us before you disclose anything. Look the phone number up in the book that way you have control of where you are calling.

HELP US KEEP YOUR DATA SECURE
